Double Patenting

1. Claims 18, 19, and 20 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 8, 9, and 10. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Saurwein (4096649) or Kraft (2155166).

Saurwein or Kraft shows an outsole comprising longitudinal ridges (24, 26, and 34 or 13) with gaps therebetween and a periferal outer edge (22 or 14) and a sharp forward heel edge (formed by 24 shown in figures1 and 3 or shown in figure 1) and the cross sectional area of the ridges and gaps increase towards the center of the sole as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3728

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Saurwein or Kraft in view of either Kaplan (1387988) or Frederick (4562651).

Saurwein or Kraft shows an outsole substantially as claimed except for slits in the outer edge. Kaplan or Frederick teaches providing slits (12 or shown in figures 5 and 6) in an outer edge. It would have been obvious to provide slits in the outer edge as taught by either Kaplan or Frederick in the outsole of either Saurwein or Kraft to increase traction and flexibility.

Allowable Subject Matter

6. Claims 6-10, 16, and 17 are allowed.

7. Claims 3-5, and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
